This book approaches environmentalism via two academic disciplines, sociology and philosophy. Both have concerns about the environment's ability not only to sustain itself but to thrive. The authors argue that rather than simple sustainability, we must promote thriving for the sake of protecting the environment and all living things. In this greatly expanded second edition, the authors have updated data and examples, introduced new topics and concepts, and emphasized the need to lessen our dependence on fossil fuels. Numerous topics are explored, from the differences between sustainability and thriving, and the overuse of plastic, to mass extinction, the role of natural disasters and more. The COVID-19 pandemic offers an added perspective on the relationship between disease and the environment. A Divinity for All Persuasions uncovers the religious signifiacnce of early America's most ubiquitous popular genre. Other than a Bible and perhaps a few schoolbooks and sermons, almanacs were the only printed items most Americans owned before 1820. Purchased annually, the almanac was a calendar and astrologically-based medical handbook surrounded by poetry, essays, anecdotes, and a variety of practical information. Employing a wealth of archival material, T.J. Tomlin analyzes the pan-Protestant sensibility distributed through the almanac's pages between 1730 and 1820. By disseminating a collection of Protestant concepts regarding God's existence, divine revelation, the human condition, and the afterlife, almanacs played an unparalleled role in early American religious life. Influenced by readers' opinions and printers' pragmatism, the religious content of everyday print supports an innovative interpretation of early American cultural and religious history. In sharp contrast to a historiography centered on intra-Protestant competition, Tomlin shows that most early Americans relied on a handful of Protestant "essentials" rather than denominational specifics to define and organize their religious lives.

In 1941, the National Park Service hired Ansel Adams to photograph national parks and other western landscapes, with the goal of creating murals for the Department of the Interior building. Although this project was canceled in 1942 at the beginning of World War II, Adams' compiled 226 stunning photographs during his work for the government. 12 of these images are presented in this 2017 mini wall calendar. Each photo was meticulously prepared by photographer and imaging expert Grant Collier in an effort to do justice to Adams' images.

Divided into six chapters, fifty-five artists talk about their material of choice. Does living in the digital age intensify our relationship with the material world? The success of One Artist, One Material, a regular feature section that has appeared in Frame magazine for over a decade, suggests that it does. An interview with a maker about his or her chosen material, it first appeared in Frame 65 (May/June 2007) and is still going strong. This book contains 55 of those interviews. Within the deceptively simple formula, dramatic, amusing, perplexing and humbling stories unfold. The subjects are enthusiastic about their chosen material to the point of monomania, spending long hours on eBay procuring vintage furniture (Michael Samuels), or behind a microscope arranging diatoms, which are invisible to the human eye (Klaus Kemp), or tracing huge yet transient patterns in sand or snow (Jim Denevan and Simon Beck, respectively). A material's simplicity often bears no relation to the complexity it expresses in the hands of a creator. Magpie feathers are shaped into disturbing spatial deluges by Kate MccGwire; white balloons are used over and over again by Charles Pétillon to undermine our perceptions of everyday reality. Over One Artist, One Material's lifetime, art and design have been steadily converging, with pop-up shops now often appearing to be art installations (and occasionally vice versa). Pressures on budgets and increasing awareness of sustainability issues have led designers to take a new look at materials, opting for recycling, making, and even growing their own. Handcrafted items have meanwhile found a new popularity and relevance. All of these material trends are prefigured in One Artist, One Material.
