

Community As Partner Theory And Practice In Nursing

Offers an engaging introduction to the theory, skills and application of community and primary health care.

A vital member of the health care team, the contemporary enrolled nurse faces increasing challenges and an increasing level of responsibility. Written specifically for Australian and New Zealand enrolled nurse students, this long awaited new edition reflects the changes and challenges in contemporary enrolled nurse practice as well as the additions and modifications that are occurring in nursing curricula. Tabbner's Nursing Care: Theory and Practice 5th edition has been written, reviewed and edited by the people who educate the enrolled nurse and continues to provide enrolled nurse students with the most comprehensive resource available. In this new text-reference, Carl Helvie explores the realm of community health care for advanced practice nurses who are currently working in community care and for anyone else who requires an understanding of the issues involved.

THE FIRST BOOK TO PRESENT THE SUCCESSES, CHALLENGES, AND OPPORTUNITIES OF GLOBAL HEALTH NURSING This text is designed specifically for nurses and nursing students who have an interest in global health as a specialty, regardless of experience or education level. It reflects both the unique contributions of the nursing profession and of other disciplines, which is in keeping with the editors' perspective on how to bring about lasting change. The text views global health through a nursing lens, but maintains this awareness and appreciation of interprofessionalism throughout. The editors and contributors have firsthand experience of the complex dynamics in achieving global health, and bring a wealth of knowledge to this important field, which has grown as a course and specialty. The text depicts the worldwide expansion of nursing partnerships between resource-rich and resource-limited countries, discusses challenges and obstacles, and provides cases and guidance on how to achieve global health. It will appeal to all nurses, from student nurses embarking on a global health experience to more experienced global health nurses who offer professional nursing expertise from around the world. The text responds to a recent WHO mandate, which seeks the input of nurses and midwives as part of an interprofessional team of key strategists for facilitating global health. "The Lancet" report is also an important document used throughout the text, and an interview with Dr. Julio Frenk, author of that report, is included. Social, political, cultural, economic, and environmental factors--including climate change--are integrated into determinants of global health. The text covers the foundations of global health, including the emerging concept of climate justice, the ethical context of global health, and the importance of interprofessional education. It addresses key issues of global health with a focus on poor and vulnerable individuals--particularly women and children--and those living in areas of conflict. In addition to describing notable accomplishments toward achieving global health, the book focuses on the need for increasing access to primary care, improving clinical practice through expanded education, and engaging interdisciplinary researchers in discovery of viable solutions. The book includes the perspectives of nurses and colleagues from other disciplines in both resource-rich and resource-limited countries. References provide resources for additional study, and PowerPoint slides and a test bank for instructors accompany the text. **KEY FEATURES** Case studies depict real-world experiences Presents firsthand knowledge of global health dynamics, challenges, and opportunities Provides a wealth of information from multiple perspectives Authored by contributors across a variety of clinical and academic roles who are experienced in global health nursing and global health Includes chapters written by nurses from both resource-limited and resource-rich countries Suellen Breakey, PhD, RN, is assistant professor at the MGH Institute of Health

Professions, in Boston, Massachusetts, where she teaches accelerated BSN students. She completed her BS in biology at Salem State University, an MSN in critical care nursing at the MGH Institute of Health Professions, and a PhD in nursing at Boston College Connell School of Nursing. Her research area is the nurse's role in treatment decision making in seriously ill adults. Her clinical interests are cardiac surgical and critical care nursing. Dr. Breakey's global nursing efforts are focused on prevention and treatment of rheumatic heart disease in resource-limited settings. She is a leader in Team Heart, a nonprofit organization that works in Rwanda. Dr. Breakey led a team that developed the teaching modules, both written materials and videos, which were translated into Kinyarwanda language for their patients. She has also organized and participated in ongoing nursing professional development

Community health nurses need specialized knowledge and skills to succeed in their unique role in health promotion and disease prevention. This thoroughly updated and revised second edition of *Community and Public Health Nursing* provides students with an excellent foundation in the theories and concepts of community nursing while also delivering practical, step-by-step guidance in conducting community nursing projects in different settings and situations. This engaging text presents real-world public and community health issues as a context for understanding the complex realities of community nursing with diverse populations. The book is informed by over thirty years of practice, education, and research in community health nursing and is packed with case studies and practice examples. Its team-based approach emphasizes collaboration with communities and other health professionals to promote the health of individuals, families, groups, and communities. Discussion questions, key terms, learning objectives, classroom and seminar exercises, and online resources create a structured framework for learning. The second edition also features new content on health equity, health literacy, and community health nursing in disaster and emergency management. With an emphasis on understanding the clinical application of theories and standards, this text is the perfect resource for community health nursing courses.

This is the Canadian edition of the *Community as Partner* text. Using a variety of Canadian references, this text provides the framework to conduct a community assessment and work with the community to develop health-promoting programs. It has a practical focus on community assessment, data analysis, community-level issue identification, program planning, intervention, and evaluation. Unit One now provides a completely Canadian perspective on health promotion, epidemiology, health risks, public policy, and multicultural communities. Unit Two reflects the community as partner model with a Canadian approach, and Unit Three contains case studies with Canadian examples. Each chapter will include specific learning objectives, key points, practice and research sections, and discussion questions. Available Canadian Connection Website, connection.lww.com/go/vollman.

When it comes to caring for children, no other resource better prepares you for practice than Wong's *Essentials of Pediatric Nursing*. Authored by Marilyn Hockenberry and David Wilson, two of the most well-known and respected names in the field, Wong's features the most readable, up-to-date, and accurate content available. An abundance of full-color illustrations helps you visualize key concepts, and highlighted boxes and tables offer quick access to vital facts and information. Plus, when you buy this book, you get unlimited access to hands-on study tools that help you learn pediatric nursing essentials with ease! Developmental approach clearly identifies key issues at each stage of a child's growth to help you provide appropriate, individualized care for each child. UNIQUE! Family focus includes a separate chapter on the role of the family in child health, family content throughout the text, and Family-Centered Care boxes that highlight information on patient teaching, home care, and incorporating the family in the child's care. An emphasis on wellness offers health promotion and injury prevention

strategies for each age group. UNIQUE! Evidence-Based Practice boxes demonstrate how research is applied to nursing care in the clinical setting. UNIQUE! Atraumatic Care boxes provide guidance for administering nursing care with minimal pain or stress to the child, family, and nurse. NEW! Safety Alerts call your attention to important patient safety considerations and support the QSEN initiative for better outcomes of nursing care. NEW! Quality Patient Outcomes content in Nursing Care Management discussions for major diseases and disorders helps you understand how the care you provide impacts patient safety and promotes positive outcomes. UNIQUE! Critical thinking case studies allow you to test and develop your analytical skills in a variety of clinical situations. NEW! Drug Alerts throughout the text emphasize important drug information and point out potential issues. NEW! Pathophysiology Reviews highlight and clarify complex pathophysiology information. Completely updated content focuses on timely, practical topics, including methods for measuring competency and outcomes, the nurse's role in injury prevention, shaken baby syndrome/traumatic brain injury, Healthy People 2020, car restraints, immunizations, late preterm infants, and childhood obesity. Expanded and updated coverage of genetics addresses the latest advances in the field as it relates to children in health and illness.

This is the Canadian adaptation of the Fifth Edition of the AJN award-winning *Community as Partner* text. Focusing on public health promotion practices in Canada, this text examines the contemporary public health nurse's role as a hands-on caregiver, community detective, and epidemiologist. Part One provides a Canadian perspective on community nursing practice and legal, ethical, and sociocultural considerations. Part Two presents the *Community as Partner Model*, and Part Three contains case studies with Canadian examples. This edition places more emphasis on supportive environments for health, the five strategies of the Ottawa Charter, primary health care, and rural communities.

Based on: *Public health nursing: population-centered health care in the community* / [edited by] Marcia Stanhope, Jeanette Lancaster. 8th ed. c2012.

2009 AJN Book of the Year Award Winner! Designated a Doody's Core Title! *Middle Range Theory for Nursing* is a textbook designed for theory and research courses in master's and doctoral programs. As described in the 2d edition of the *Encyclopedia of Nursing Research*, middle range theory "is a basic, usable structure of ideas, less abstract than grand theory and more abstract than empirical generalizations or micro-range theory . Middle-range theories are developed and grown at the intersection of practice and research to provide guidance for everyday practice and scholarly research rooted in the discipline of nursing." In this revised and updated second edition, the authors will revise the eight theories that were examined in the first edition with published research and practice updates along with any changes in the basic concepts and models. Seven new theories will be added. Each theory is presented by the theorist in a consistent format: purpose of the theory; basic concepts; relationships among the concepts, the model; use of the theory in nursing research and/or practice; conclusions; references. Theories new to the second edition Symptom Management (Dodd et al.) Caring (Swanson) Embodied Language (Liehr et al.) Cultural Self-reliance (Lowe) Caregiver Stress (Tsai) Clinical Decision Making (Chase) Moral Reckoning (Nathaniel) "In less than 300 pages, this book nicely integrates epidemiological concepts, evidence-based practice in population health, and program development and evaluation....Authors describe epidemiological research designs, research synthesis, and evidence assessment--knowledge essential for advanced practice nurses working

with populations or in the community. Another highlight in this book is the assessment of health program quality and population health outcomes."--Journal of Community Health Nursing Population-Based Nursing is the first text designed specifically for the Doctor of Nursing Practice (DNP) core competencies in epidemiology and population health. This unique guide addresses essential areas of content recommended by the American Association of Colleges of Nursing (AACN) to ensure graduate students are adequately prepared to enter the nursing field. This groundbreaking textbook provides readers with the information they need to identify health care needs at the population level and to improve population outcomes, two important core competencies outlined by AACN for all DNP programs. Key Features: Content on acute, sub-acute, and long term care, and community population health Case studies with examples of successful strategies that nurses have used to improve population outcomes High-level application activities that aim to help readers achieve Healthy People 2020 health initiatives and improve population health Information on the identification of health care disparities and the strategies for eliminating or mitigating them

Featuring the most accurate, current, and clinically relevant information available, Maternal Child Nursing Care in Canada, 2nd Edition, combines essential maternity and pediatric nursing information in one text. The promotion of wellness and the care for women experiencing common health concerns throughout the lifespan, care in childbearing, as well as the health care of children and child development in the context of the family. Health problems including physiological dysfunctions and children with special needs and illnesses are also featured. This text provides a family-centred care approach that recognizes the importance of collaboration with families when providing care. Atraumatic Care boxes in the pediatric unit teach you how to provide competent and effective care to pediatric patients with the least amount of physical or psychological stress. Nursing Alerts point students to critical information that must be considered in providing care. Community Focus boxes emphasize community issues, supply resources and guidance, and illustrate nursing care in a variety of settings. Critical thinking case studies offer opportunities to test and develop analytical skills and apply knowledge in various settings. Emergency boxes guide you through step-by-step emergency procedures. Family-Centred Teaching boxes highlight the needs or concerns of families that you should consider to provide family-centred care. NEW! Content updates throughout the text give you the latest information on topics such as perinatal standards, mental health issues during pregnancy, developmental and neurological issues in pediatrics, new guidelines including SOGC, and CAPWHN, NEW! Increased coverage on health care in the LGBTQ community and First Nations, Metis, and Inuit population NEW! Medication Alerts stress medication safety concerns for better therapeutic management. NEW! Safety Alerts highlighted and integrated within the content draw attention to developing competencies related to safe nursing practice.

Never HIGHLIGHT a Book Again! Virtually all of the testable terms, concepts, persons, places, and events from the textbook are included. Cram101 Just the FACTS101 studyguides give all of the outlines, highlights, notes, and quizzes for your textbook with optional online comprehensive practice tests. Only Cram101 is Textbook Specific. Accompanys: 9780781786430 .

Never HIGHLIGHT a Book Again Includes all testable terms, concepts, persons,

"The book is organized in three sections: a theoretical section that sets the foundation for how and why we work as partners with the communities we serve; a process section that details the activities of the CCAP model in action; and a section of stories from a variety of contributors that tell the tales of working in and with communities from sea to sea to sea (and overseas)"--Provided by publisher.

Wong's Essentials of Pediatric Nursing: Second South Asian Edition

A practical approach helps you learn and apply core concepts of community and public health nursing. This text emphasizes both community and family as client, so you'll gain a solid understanding of these important specialties. Numerous real-life examples demonstrate your roles and responsibilities as a community health nurse.

Master the nurse's role in health promotion for Canadian populations and communities! Stanhope and Lancaster's Community Health Nursing in Canada, 4th Edition covers the concepts and skills you need to know for effective, evidence-informed practice. It addresses individual, family, and group health as well as the social and economic conditions that can affect the health of a community. Concise, easy-to-read chapters include coverage of the latest issues, approaches, and points of view. Written by Canadian educators Sandra A. MacDonald and Sonya L. Jakubec in collaboration with Indigenous scholar Dr. R. Lisa Bourque Bearskin, this edition makes it even easier to apply nursing principles and strategies to practice.

UNIQUE! Evidence-Informed Practice boxes illustrate how to apply the latest research findings in community health nursing. UNIQUE! Indigenous Health: Working with First Nations Peoples, Inuit, and Métis chapter details community health nursing in Indigenous communities.

UNIQUE! Determinants of Health boxes highlight the critical factors contributing to individual or group health. Levels of Prevention boxes give examples of primary, secondary, and tertiary prevention related to community health nursing practice. CHN in Practice boxes in each chapter provide unique case studies to help you develop your assessment and critical thinking skills. How To boxes use real-life examples to provide specific, application-oriented information. Ethical Considerations boxes provide examples of ethical situations and relevant principles involved in making informed decisions in community health nursing practice. Cultural Considerations boxes present culturally diverse scenarios that offer questions for reflection and class discussion. Chapter Summary sections provide a helpful summary of the key points within each chapter. NEW! NGN-style case studies are provided on the Evolve companion website. NEW! Thoroughly updated references and sources present the latest research, statistics, and Canadian events and scenarios, including the latest Community Health Nurses of Canada (CHNC) Canadian Community Health Nursing Standards of Practice (2019 edition). NEW! Expanded coverage of global health, global issues, and the global environment is integrated throughout the book. NEW! Revised Working with Working with People Who Experience Structural Vulnerabilities chapter views vulnerable populations through a social justice lens. NEW! Enhanced content provides greater application to practice. NEW! Further clarification of the differing roles of CHNs and PHNS is provided.

This unique text combines traditional parish nursing content with community health nursing methodology, coverage of community and faith community assessment, and health education and health promotion/disease prevention programming.

The text is written for students and clinicians working in community nursing in Australia and New Zealand. The text first provides a broad overview of global and national primary health policies and practices. Health promotion is highlighted throughout and a partnership approach

is used to show how community nurses can work effectively with communities. The next part of the text details the processes involved in community nursing and a real-life case study is provided to help the reader translate theory into practice. A wide range of communities are presented with numerous examples of successful health promotion programs and activities. The community groups represented in the text include children, working adults, older people, people with chronic conditions, Indigenous communities and rural populations, immigrants and refugees. A separate chapter covers mental health promotion. Each chapter starts with set of learning objects and end with a summary and critical thinking questions. Boxes are used to highlight key issues and examples throughout. The text is designed to be a user-friendly resource.

An Introduction to Community and Primary Health Care introduces students to the theory, skills and professional roles in community settings.

The sixth edition of Community Health and Wellness has been fully revised and streamlined to incorporate contemporary thinking and research in community health and wellness from Australia, New Zealand and the global community. Written by Jill Clendon and Ailsa Munns, the new edition provides an easy-to-use text with a strong focus on the foundational principles of primary health care that underpin community health and wellness. The text builds on the unique socio-ecological approach to primary health care of previous editions, guiding readers to consider the health of individuals and populations in their personal, family and community environments. Ancillary resources and eBook available on Evolve Focus on primary health care across the lifespan, with an emphasis on health literacy and health promotion Chapter features include reflective practice and care planning for individuals, families and communities, case studies, interventions and evaluation Visit evolve.elsevier.com for your additional resources eBook on VitalSource Instructor resources: Critical Thinking Questions and Answers Image Collection PowerPoints Tutorial Activities Student and Instructor resources: Weblinks Online Care Plans Online Material Greater emphasis on nurses and other health practitioners working in partnership with people and communities Updated local case studies to support the practical application of knowledge to practice Additional signposted sources of knowledge online to promote engagement and further enquiry Comprehensive coverage on community assessment including a new community assessment framework Condensed and restructured table of contents New information on the importance of the early years including preconception New section on project planning to achieve community wellness Now includes an eBook with all print purchases

Social problems.

Ensure you have a solid understanding of community and public health nursing with this industry standard text! Public Health Nursing: Population-Centered Health Care in the Community, 10th Edition provides up-to-date information on issues such as infectious diseases, natural and man-made disasters, and healthcare policies affecting individuals, families, and communities. This new edition has been thoroughly updated to reflect current data, issues, trends and practices presented in an easy-to-understand, accessible format. Additionally, real-life scenarios show examples of health promotion and public health interventions. Ideal for BSN and Advanced Practice Nursing programs, this comprehensive, bestselling text will provide you with a greater understanding of public health nursing! Focus on Quality and Safety Education for Nurses boxes give examples of how quality and safety goals, knowledge, competencies and skills, and attitudes can be applied to nursing practice in the community. Healthy People boxes highlight goals and objectives for promoting the nation's health and wellness over the next decade. Linking Content to Practice boxes provide examples of the nurse's role in caring for individuals, families, and populations in community health settings. Evidence-Based Practice boxes illustrate the use and application of the latest research findings in public/community health nursing. UNIQUE! Separate chapters on healthy

cities, the Intervention Wheel, and nursing centers describe different approaches to community health initiatives. Levels of Prevention boxes identify specific nursing interventions at the primary, secondary, and tertiary levels. End-of-chapter Practice Application scenarios, Key Points, and Clinical Decision-Making activities promote application and in-depth understanding of chapter content. UPDATED Content and figures reflect current data, issues, trends, and practices. How To boxes provide you with practical application practice. NEW! Check Your Practice boxes added throughout feature scenarios and discussion questions to promote active learning.

Written by Gabby Koutoukidis and Kate Stainton, *Tabbner's Nursing Care: Theory and Practice* 8th edition provides students with the knowledge and skills they will require to ensure safe, quality care across a range of healthcare settings. Updated to reflect the current context and scope of practice for Enrolled Nurses in Australia and New Zealand, the text focuses on the delivery of person-centred care, critical thinking, quality clinical decision making and application of skills. Designed for undergraduate nursing students, practicing community nurses and other health professionals, this second edition of *Community as Partner: Theory and Practice in Nursing* provides invaluable up-to-date strategies and frameworks for working in partnership with communities to plan and implement health programs.

This text is suitable for students taking *Community Health Nursing* or for the beginning practitioner in the field of *Community Health Nursing*. It is designed to provide direction for small-scale community health projects, ranging from about two to eight months in length. This text is a comprehensive coverage of concepts critical to the development of the nursing role: philosophy, nature of nursing, ways of knowing, influences on the development of the nursing profession, history and nature of nursing science, evolution of nursing practice and education.

Historically, community health nursing has responded to the changing health care needs of the community and continues to meet those needs in a variety of diverse roles and settings. *Community Health Nursing: Caring for the Public's Health, Second Edition* reflects this response and is representative of what communities signify in the United States--a unified society made up of many different populations and unique health perspectives. This text provides an emphasis on population-based nursing directed toward health promotion and primary prevention in the community. It is both community-based and community-focused, reflecting the current dynamics of the health care system. The Second Edition contains new chapters on disaster nursing and community collaborations during emergencies. The chapters covering Family health, ethics, mental health, and pediatric nursing have all been significantly revised and updated.

Public health practice focuses on the prevention of disease and disability as a means of promoting the health of individuals and their communities. Achieving this is dependent on nurses and public health practitioners implementing the core functions of practice—assessment, assurance, and policy development. Because the public health workforce is composed of

individuals from a number of disciplines with varying areas of expertise, there is a clear need for a thorough examination of the core competencies necessary for successful public health based on community needs. Developed as an advanced text for students in public and community health nursing, *Public and Community Health Nursing Practice* presents a comprehensive summary of the core functions of population-based practice. This practice is the cornerstone of the Healthy People 2010 national objectives, and the foundation upon which the health of a given community may be ensured. The book's population-based approach, theoretical content, and emphasis on evidence-based research are perfectly suited for faculty and students in nursing, public health, and behavioral medicine. Author Demetrius James Porche also includes current public health and nursing practice, making this a unique and indispensable reference for public and community health nurses and nursing administrators, as well as practitioners in other specialties, such as family or primary care nursing. The book also includes appendices, illustrations, tables, and chapter summaries that reiterate important public and community population-based health nursing content.

"This superb collection of 57 readings from 100 leaders and experts in the community and public health combines classic articles and recently published discussions to offer a practical, hands-on guide to the key issues affecting community health nursing today."--Cover.

The 10th edition of the *Nursing Diagnosis Handbook* makes formulating nursing diagnoses and creating individualized care plans a breeze. Updated with the most recent NANDA-I approved nursing diagnoses, this convenient reference shows you how to build customized care plans in three easy steps: assess, diagnose, plan. Authors Elizabeth Ackley and Gail Ladwig use Nursing Outcomes Classification (NOC) and Nursing Interventions Classification (NIC) to guide you in creating care plans that include desired outcomes, interventions, patient teaching, and evidence-based rationales. Unique! Care Plan Constructor on the companion Evolve website offers hands-on practice creating customized plans of care. Alphabetical thumb tabs allow quick access to specific symptoms and nursing diagnoses. Suggested NIC interventions and NOC outcomes in each care plan. Recent and classic research examples promote evidence-based interventions and rationales. NEW! 4 Color text NEW! Includes updated 2012-2014 NANDA-I approved nursing diagnoses NEW! Provides the latest NIC/NOC, interventions, and rationales for every care plan. NEW! QSEN Safety interventions and rationales NEW! 100 NCLEX exam-style review questions are available on the companion Evolve website. NEW! Root Causing Thinking and Motivational Interviewing appendixes on the companion Evolve website.

An essential community health resource for every Canadian nursing student, *Canadian Community as Partner: Theory & Multidisciplinary Practice* delivers an accessible, engaging introduction to the theoretical and practical foundations of community and population health — tailored specifically to the Canadian nurse. The updated Fifth Edition of this acclaimed text familiarizes students with public health and health promotion through the multidisciplinary Canadian Community-as-Partner (CCAP) model and includes realistic case studies reflecting a range of contemporary Canadian settings, empowering students to confidently meet the needs of diverse populations and develop into an effective community participant.

"This very interesting book provides a good overview of the evolution of the art and practice of nursing...Recommended."--Choice: Current Reviews for Academic Libraries "This collected work by scholars Smith, Turkel, and Wolf stands as a classic indeed. It offers nursing and related fields a repository and living history of the evolution of nursing within a caring science paradigm over a 40-year span from foundational ideas and developments, to current work in education, research, and institutional/community practices of caring...[The work] sustains and advances knowledge of human caring to serve humanity." From the Foreword by Jean Watson, PhD, RN, AHN- BC, FAAN Founder, Watson Caring Science Institute This is a core resource for nursing educators and students at all levels who seek fundamental perspectives

on the art and science of caring. The text comprises 37 classic book chapters and journal articles written by leaders in the field and illuminate the evolution of the caring paradigm--from its beginnings as a philosophical/ethical/theoretical guide to nursing, to implications for the future development of caring science. Co-published with the Watson Caring Science Institute (WCSI), it will also be a primary resource for students attending WCSI programs and for in-service education programs, especially in hospitals with, or seeking, Magnet status. Each section features an introductory essay illuminating important concepts, followed by reflective questions appropriate for baccalaureate, master's, and doctoral levels. Also included are multiple-choice questions, a variety of case studies, a digital teacher and student resource with PowerPoints for key ideas, and more. The book is organized into nine sections providing an in-depth analysis of the evolution of caring scholarship; systematic reviews of the concept of caring; theoretical perspectives, including conceptual orientations, middle-range theories, and grand theories; seminal research studies; research designs and methods; practice models for the integration of caring within contemporary hospital-based practice environments; caring in communities and for the environment; leadership and administrative issues with a focus on caring and economics; and the future of caring science. Key Features: Presents the seminal literature on caring Co-published with the Watson Caring Science Institute Provides reflective/critical thinking questions tailored to academic levels For use in baccalaureate, graduate, doctoral, and in-service education, and as a core resource for WCSI programs Is accompanied by a digital teacher and student guide (please contact textbook@springerpub.com to request this content)

"This user-friendly text is presented as a handbook for students and practicing nurses who work with communities to promote health. Community as Partner focuses on the essentials of practice with the community. Students will find this text helpful for the many examples of working with the community as partner. For over 20 years and five editions, this textbook has served undergraduate, RN to BS, and RN to MS students and graduate students alike as a framework for professional nursing practice in the community. Our intention is to keep the text basic and accessible to all who practice in the community. Using this text with distance education and virtual learning with Internet resources will enrich practice in any community. This sixth edition continues the philosophy of the authors by strengthening the theoretical base with new chapters on globalization and rural health. All other chapters have been revised and updated from the fifth edition. We continue with a series of chapters that takes the reader through the entire nursing process by using a real-life community as our example. The urban example is enhanced and expanded throughout the remainder of the book by selected aggregates which serve as exemplars of working with the community as partner as well. "
