How can we create effective partnerships between home, school and the community? How can the relationships and communication between families and school be strengthened? How can families help schools to improve behaviour in their children, both at home and at school? Using a tried and tested framework that has been successfully implemented throughout a wide variety of very different schools and settings, 'Family Values' is a Scheme which engages and empowers families to work in close collaboration with schools and organisations, and which results in long-term improvements in behaviour, communication, pupil achievement and relationships. The

'Family Values' Scheme has been proven to: Help pupils to be more academically diligent Help schools to assume a calmer, more peaceful ambience Forge better pupil-teacher relationships Improve Pupil and teacher wellbeing Help parents to be more engaged with the school Improve children's literacy, behaviour and attendance Provide head teachers and their staff with an effective whole-school strategy. The authors' award-winning 'Family Values' Scheme is underpinned by sound theoretical principles, and they show here how it has been successfully put into practice through case studies in real school settings. The book explores how the Scheme promotes social, emotional and family system theories, and, in linking effectively to SEAL (social and emotional aspects of learning), the Scheme compliments existing personal and social education programmes in all schools. Showing schools and organisations how to create effective partnerships with families and the community in a fun, exciting and sustainable way, Better Behaviour through Home-School Relations will be of huge benefit to all school staff, as well as local authorities, support groups, parents, charities and services.

High schools are tirelessly pondering ideas of enhancing the learning environment by increasing academic engagement and safety. This phenomenology study was designed to report and analyze the perceptions of selected students about their academic engagement and safety while attending one high school. Data for this study were obtained through interviews that were conducted on two levels: focus group and individual interviews. The results indicate that uniforms by themselves have little to do with a student's academic engagement. Students believe that their teachers play a big part in the way that they participate in educational tasks. They also believe that engaging in academics has great consequences such as becoming a member of certain school

organizations, graduating from school, and furthering their education. This study suggests that simply requiring students to wear uniforms will not cause them to become more academically engaged nor will it make schools safer.

However, when a mandatory uniform policy is in place, the learning environment is enhanced because fewer instances of teasing and fighting over jealousy will occur.

Discusses the arguments supporting and opposing dress codes in schools, including if dress codes are legally enforceable, if they create a better learning environment, and if they restrict religious freedom.

Does clothing make the person or does the person make the clothing? How does what attire a student wears to school affect their academic achievement? In 1996, President Clinton cited examples of school violence and discipline issues that might have been avoided had the students been wearing uniforms ("School uniforms: Prevention or suppression?"). In his 1998 State of the Union address, he mentioned the positive impact uniforms had made in the Long Beach Unified School District, which has a highly diverse ethnic and socioeconomic population that is also the third largest district in California. When students have continuous negative experiences in school, dropping out and delinquency tend to be the common responses. The role of schools is to provide a positive, safe and secure learning environment where students feel protected enough to explore and develop their intellectual and social competencies. Hard evidence that proves the wearing of uniforms provides a direct link to better academic achievement is not conclusive, however, there is evidence that supports there are fewer discipline problems/referrals and violence as well as higher attendance rates since the implementation of a uniform policy. What appears to have been

overlooked in the data analysis is the effect of other programs that are often being implemented at the same time as the uniform policy and may also have a direct impact on the discipline and attendance issues. There are many arguments for and against school uniform policies. The pros and cons of school uniform are listed in this paper. (Contains 14 online resources.).

With all the recent violence in schools more and more administrators are looking to adopt and implement a uniform policy. School boards and administrators are under the assumption that when students wear a uniform there are fewer behavior problems, a more positive climate, and even improved academic achievement. The purpose of this study is to look at the history of the school uniform as well as the results from some case studies in which a uniform policy was implemented and the changes if any it brought about. In addition, this study includes data from the Chester Academy, a pre K-8 rural school. Survey results from parents, teachers, and middle level students showed predictable results with teachers having the strongest support for school uniforms and students having the least. The findings suggest a slight improvement in overall behavior and

In *Balancing Change and Tradition in Global Education Reform*, Rotberg brings together examples of current education reforms in sixteen countries, written by 'insiders'. This book goes beyond myths and stereotypes and describes the difficult trade-offs countries make as they attempt to implement reforms in the context of societal and global change. In some countries, reforms are a response to major political or economic shifts; in others, they are motivated by large upsurges in immigration and increased student diversity. Irrespective of the reasons for education reform, all countries face decisions about resource allocation, equality of educational opportunity across diverse populations, access to higher education, student testing and tracking, teacher accountability, school choice, and innovation. about his experiences growing up in a small New England town, from his childhood years, attending parochial school, to his adolescent years, continuing parochial school and becoming an active member of a drum and bugle corps for ten years. the story continues into early adulthood when he enlisted into the United States Marine Corps, through boot camp, and then serving two tours of duty, 1969 through 1970, in Vietnam. It is a factual description of his life as he grew up and through his experiences of wearing many uniforms, which shaped his life and future forever. the language used in this book is sometimes graphic, with four-letter expressions. However, it is the exact language that was so commonly used during that era. the author does his best at explaining what it was like to grow up in the late 1950s and the 1960s, attending school taught only by nuns. Then while still attending school, joining a drum and bugle corps and all his experiences traveling around New England and Canada, performing in parades and field competitions. At eighteen years old, he enlisted into the Armed Forces, United States Marine Corps, and explains what life was like at eighteen years old in 1968 to go through boot camp at Parris Island in South Carolina. As his marine infantry training continued, the author describes, in detail and in his own words, what it was like as the Marine Corps prepared him and many others like him for combat in Vietnam. the author then describes, to the best of his recollection and ability, what life was like in Vietnam in 1969 while he was attached to a marine combat unit in Quang Tri Province of Southern Vietnam. the book goes on to describe how,

at the end of 1969, he was redeployed to another combat unit south of Da Nang. the author stayed in Vietnam until mid-August of 1970 and then was released from active duty and returned home at the age of twenty-one. This book speaks from the heart and mind of everyone who has ever had the experience of attending a Catholic school with nuns, all those who were ever so fortunate to be a member of a drum and bugle corps, and all those combat veterans who served in Vietnam and experienced the rigors and sorrows of that war.
