

Dying In The City Of The Blues Sickle Cell Anemia And The Politics Of Race And Health

A Redesign of the Classic Work by Francis A. Schaeffer Few Christians had a greater impact on the Christian response to modernism and postmodernism during the last half of the twentieth century than Francis A. Schaeffer, whose works offered a seemingly prophetic perspective that anticipated shifts in culture long before they happened. In *Death in the City*, originally written against the backdrop of the 1960s countercultural upheaval, Schaeffer shows that when the intellectual and spiritual foundation of a society fails, the society itself is destined to crumble. The death that follows subtly suffocates truth, meaning, and beauty out of the culture. Schaeffer offers a simple response to the rejection of biblical principles we see in our day—commitment to God’s word as truth. This commitment is often a costly practice, but it is compassion for a world that is lost and dying without the gospel. *Death in the City* encourages us to respond to the changing culture—not by hiding away, but by living each aspect of life in supernatural communion with the Lord.

Matt Johnson had a life he was happy enough with. Could he learn to be happy with his death as well? This zombie story is written from his point of view-- from normal, every-day security guard, to brain-eating, mindless zombie.

"Rich and riveting, complex and compelling, powerful and poetic."—Peter M. Gianotti, *Newsday* In Odessa, the greatest port on the Black Sea, a dream of cosmopolitan freedom inspired geniuses and innovators, from the writers Alexander Pushkin and Isaac Babel to Zionist activist Vladimir Jabotinsky and immunologist Ilya Mechnikov. Yet here too was death on a staggering scale, as World War II brought the mass murder of Jews carried out by the city’s Romanian occupiers. Odessa is an elegy for the vibrant, multicultural tapestry of which a thriving Jewish population formed an essential part, as well as a celebration of the survival of Odessa’s dream in a diaspora reaching all the way to Brighton Beach.

Having survived the worst effects of the Civil War, the city of Memphis, battered but unbowed, finds itself facing a far more dangerous foe. It is invisible, lethal, and unstoppable: a plague of yellow fever. It is the story of JP Mahoney, 14-year-old farm boy who dreams of escape from tedious chores and farmlife routine. It is the story of a courageous young woman, Ginnie Moon, onetime Confederate spy, who now operates a boarding house for men who have survived the war. And it is the story of Kevin O'Boyle, an embittered riverfront laborer, who blames the world for his troubles, and finds the crippled city his perfect prey. Several characters in the novel are actual historical figures, most notably Ginnie Moon, Judge "Pappy" Hadden, and Cap'n Jim Lee. Their actions, and those of the other characters, are entirely fictional. The plague, one of several to hit the city in the years following the war, was all too real.

"Beyond the End (A Gospel of Death)" is the preliminary and unedited version of a multiple volume series of Christian-horror books, which are loosely based on visions that the author and multiple individuals have experienced during failed suicide attempts. The testimonials have been formatted into gripping stories that encompass a post-apocalyptic and historical atrocity chronicle. The amazingly horrific and shocking tales will take you on a dark and terrifying journey into a supernatural world, void of the grace of God, thereby glorifying the contrast of a great and gracious life that one is privileged to live while alive in Christ! NOT FOR SENSITIVE READERS!

In this eye-opening cultural history, Brian Tochtermann examines competing narratives that shaped post–World War II New York City. As a sense of crisis rose in American cities during the 1960s and 1970s, a period defined by suburban growth and deindustrialization, no city was viewed as in its death throes more than New York. Feeding this narrative of the dying city was a wide range of representations in film, literature, and the popular press--representations that ironically would not have been produced if not for a city full of productive possibilities as well as challenges. Tochtermann reveals how elite culture producers, planners and theorists, and elected officials drew on and perpetuated the fear of death to press for a new urban vision. It was this narrative of New York as the dying city, Tochtermann argues, that contributed to a burgeoning and broad anti-urban political culture hostile to state intervention on behalf of cities and citizens. Ultimately, the author shows that New York's decline--and the decline of American cities in general--was in part a self-fulfilling prophecy bolstered by urban fear and the new political culture nourished by it.

An urgent picture of medical care in our cities, written by an emergency room physician (and co-author of the New York Times bestseller *The Pact*) who grew up in the very neighborhood he is now serving “A pull-no-punches look at health care from a seldom-heard sector . . . Living and Dying isn’t a sky-is-falling chronicle. It’s a real, gutsy view of a city hospital.”—*Essence* In this book, Dr. Sampson Davis looks at the healthcare crisis in the inner city from a rare perspective: as a doctor who works on the front line of emergency medical care in the community where he grew up, and as a member of that community who has faced the same challenges as the people he treats every day. He also offers invaluable practical advice for those living in such communities, where conditions like asthma, heart disease, stroke, obesity, and AIDS are disproportionately endemic. Dr. Davis’s sister, a drug addict, died of AIDS; his brother is now paralyzed and confined to a wheelchair as a result of a bar fight; and he himself did time in juvenile detention—a wake-up call that changed his life. He recounts recognizing a young man who is brought to the E.R. with critical gunshot wounds

as someone who was arrested with him when he was a teenager during a robbery gone bad; describes a patient whose case of sickle-cell anemia rouses an ethical dilemma; and explains the difficulty he has convincing his landlord and friend, an older woman, to go to the hospital for much-needed treatment. With empathy and hard-earned wisdom, *Dying and Dying in Brick City* is an important resource guide for anyone at risk, anyone close to those at risk, and anyone who cares about the fate of our cities.

This revelatory and groundbreaking book concludes with the author's analysis of the case for closing Rikers Island jails and his advice on how to do it for the good of the incarcerated.

This groundbreaking book chronicles the history of sickle cell anemia in the United States, tracing its transformation from an "invisible" malady to a powerful, yet contested, cultural symbol of African American pain and suffering. Set in Memphis, home of one of the nation's first sickle cell clinics, *Dying in the City of the Blues* reveals how the recognition, treatment, social understanding, and symbolism of the disease evolved in the twentieth century, shaped by the politics of race, region, health care, and biomedicine. Using medical journals, patients' accounts, black newspapers, blues lyrics, and many other sources, Keith Wailoo follows the disease and its sufferers from the early days of obscurity before sickle cell's "discovery" by Western medicine; through its rise to clinical, scientific, and social prominence in the 1950s; to its politicization in the 1970s and 1980s. Looking forward, he considers the consequences of managed care on the politics of disease in the twenty-first century. A rich and multilayered narrative, *Dying in the City of the Blues* offers valuable new insight into the African American experience, the impact of race relations and ideologies on health care, and the politics of science, medicine, and disease.

Recommended for mature age 13 and up. I've seen a lot in my thirteen years of life. I've run away and been rescued. I've had children and lost them. I've lived in cages and in beautiful homes. But these days, a lot of my thinking is done behind closed eyelids, as I just feel so old and tired all the time. Now, you're probably confused at this point because, in human years, thirteen isn't old at all; but in dog years, especially if you're a sheltie like me, that's ancient. So, when my human parents-the best people you could ever meet-started moping around the house, I knew something was up. For a few days, I tried to ignore it, but after another visit to the doctor, we all had to finally face the truth. I am dying. But the story I have to tell you isn't a sad one. You might say we dogs tend to view the world through rose-colored glasses. But really, we just see it for the wonderful place it is. Sure, there are difficult moments, but that's just it-they are momentary. The way I see it, every day we have a choice to love, laugh, and be grateful.

The story behind the podcast *Crimetown*, as told by the notorious Buddy Cianci himself. An election is a war and "to the victor belongs the spoils." That's the real democratic process. After all, you'll never see a victorious politician tell his supporters, "I want to thank all of you who worked so hard for my election. However, in the interest of good government, I've decided to give all the jobs to those people who voted against me." This belief became Buddy Cianci's mantra. Following his own rules, Cianci spent almost three decades as mayor of Providence, RI... before leaving for an enforced vacation in a federally funded gated community. Providence was a dying industrial city when he first took office, but he helped turn it into one of the most desirable places to live in America. He did it by playing the game of hardball politics as well as it has ever been played, living up to his favorite Sinatra lyric "I did it my way"—because that's the only way a mayor can run a city. If you want to know the truth about how politics is played, you picked the right book. This is the behind-the-locked-door story of how politics in America really works. Here is a man who has been called many things: "America's Most Innovative Mayor," a "colorful character," and a convicted felon. But no one has ever called him shy. Here, he serves it all up.

HOW TO SUCCEED IN HEAVEN WITHOUT REALLY DYING is not a self-help book, but a darkly satirical, modern-day urban fairy tale concerning the adventures of a young man coming to terms with life, death, and all their crummy consequences. It's also the underground novel that prompted a letter of complaint from a member of the Church of Scientology, even though the author wrote enough to offend just about everybody. "A masterpiece." -Christie Schuler Smith, *The Valdosta Voice*"McDaniel shows real storytelling talent and a penchant for irreverent humor." -Debbie Lee Wesselmann, author of *Trutor & the Balloonist* and *The Earth and the Sky*"A little gem I personally found myself laughing out loud for more than is strictly healthy." -Nigel, *Booklore: The Site for Book Lovers / Booklore.co.uk*"Wonderful characters and clever situations, laced with a hilarious and occasionally sick and twisted sense of humor It's funny, exciting, poignant, even scary, with some big surprises and nice twists " -Brian Cartigan, *Bookmuse.com*

"People are dead, slaughtered like animals in the night. The reigning power, the Hulcandans, blame rebels. Rabreah, a rebel, knows it's a lie. Her younger sister, Ariliah, doesn't; like the majority of the townspeople, she believes those in authority, swallowing their words with complete trust. Besides, she's too busy fighting her own silent war at home. While Rabreah dedicates herself to truth and freedom, Ariliah is just trying to survive their mother's abuse. But as unknown forces threaten to rip their world apart, the line between friend and enemy blurs. All is not as it seems. In fact, nothing may be."--Back cover.

What is your destiny as a child of God? Straight to the point, author Brian Echevarria cuts to the core of pursuing God and what role dying to self plays in it. With accuracy and understanding, *The Death of a Saint* is a refreshing book for Christians of all levels of maturity who know it is time to go deeper in their walk with Jesus Christ. This book not only speaks to the future of every saint but reaches into the Eternity of the word to do it. This powerful message is full of extraordinary revelation that will thrust you into your destiny as a child of God. The Lord wants to visit with you, and Brian's insight will help you to be ready when He comes.

Examines the effects of television culture on how we conduct our public affairs and how "entertainment values" corrupt the way we think.

The key to Earth's destruction lies buried in its past. Visiting Paris in 1979, the Doctor and Romana's hopes for a holiday are soon shattered by armed thugs, a suave and dangerous Count, a plot to steal the Mona Lisa and a world-threatening experiment with time. Teaming up with a British detective, the Time Lords discover that a ruthless alien plot hatched in Earth's pre-history has reached its final stage. If Scaroth, last of the Jagaroth, cannot be stopped then the human race is history, along with all life on Earth.

Traces the history of sickle cell anemia in the United States including the establishment of the first sickle cell clinics in Memphis in the 1950s and the impact of medical development.

One of Apple's Most Anticipated Books of Winter 2021 A quest to explore some of the most spectacular ancient cities in human history—and figure out why people abandoned them. In *Four Lost Cities*, acclaimed science journalist Annalee Newitz takes readers on an entertaining and mind-bending adventure into the deep history of urban life. Investigating across the centuries and around the world, Newitz explores the rise and fall of four ancient cities, each the center of a sophisticated civilization: the Neolithic site of Çatalhöyük in Central Turkey, the Roman vacation town of Pompeii on Italy's southern coast, the medieval megacity of Angkor in Cambodia, and the indigenous metropolis Cahokia, which stood beside the Mississippi River where East St. Louis is today. Newitz travels to all four sites and investigates the cutting-edge research in archaeology, revealing the mix of environmental changes and political turmoil that doomed these ancient settlements. Tracing the early development of urban planning, Newitz also introduces us to the often anonymous workers—slaves, women, immigrants, and manual laborers—who built these cities and created monuments that lasted millennia. *Four Lost Cities* is a journey into the forgotten past, but, foreseeing a future in which the majority of people on Earth will be living in cities, it may also reveal something of our own fate.

Today, the debate about our health care system is raging, but it often seems too complex or politically-driven for people to navigate. There has perhaps never been a better time to share with the American public a book that explains the state of our health care in an honest, comprehensive, and relatable way. *Dying of Health Care*, authored by a primary care physician with nearly 40 years of experience practicing in the U.S. and U.K., provides an easy-to-understand examination of the American health care system's major problems and potential solutions. Dr. Hanna explores the all-important question facing us today: why are Americans paying much more per person for health care than those in other developed nations, but getting much less in terms of quality? Approaching this painful paradox through a clinician's eyes, Dr. Hanna first makes a careful diagnosis and then prescribes an appropriate treatment to heal our ailing system. He shares real-life examples of patients and provides insights into the minds of doctors, including how their decisions influence the costs and outcomes of treatments. Ultimately, Dr. Hanna exposes how the system harms us - even sometimes kills us - both physically and financially, and he offers innovative solutions that can work to create the quality, affordable system we deserve.

Terrie and Doug Oxtal gave their lives to a dream. After over 35 years of marriage the result of their devotion to four children and each other, life was perfect until the day they left the hospital with only their youngest son Andrew's jacket. The unspeakable grief that took over their lives is captured in letters written to Andrew where the love spills on to every page. The journey is there, the love is there, the sense of loss is there between the lines of shock and pain, with a true understanding of compassion. The Oxtal family knows Andrew has gone home, and they live with him in their hearts, until they meet again. For those who have suffered the loss of a child, this mother's letters will take you to a place so familiar they won't make you feel alone. For those who have not lost a child, this book will take you to a place where love is all that matters.

The gripping, true story of a brutal serial killer who unleashed his own reign of terror in Nazi-Occupied Paris. As decapitated heads and dismembered body parts surfaced in the Seine, Commissaire Georges-Victor Massu, head of the Brigade Criminelle, was tasked with tracking down the elusive murderer in a twilight world of Gestapo, gangsters, resistance fighters, pimps, prostitutes, spies, and other shadowy figures of the Parisian underworld. But while trying to solve the many mysteries of the case, Massu would unravel a plot of unspeakable deviousness. The main suspect, Dr. Marcel Petiot, was a handsome, charming physician with remarkable charisma. He was the “People's Doctor,” known for his many acts of kindness and generosity, not least in providing free medical care for the poor. Petiot, however, would soon be charged with twenty-seven murders, though authorities suspected the total was considerably higher, perhaps even as many as 150. Petiot's trial quickly became a circus. Attempting to try all twenty-seven cases at once, the prosecution stumbled in its marathon cross-examinations, and Petiot, enjoying the spotlight, responded with astonishing ease. Soon, despite a team of prosecuting attorneys, dozens of witnesses, and over one ton of evidence, Petiot's brilliance and wit threatened to win the day. Drawing extensively on many new sources, including the massive, classified French police file on Dr. Petiot, *Death in the City of Light* is a brilliant evocation of Nazi-Occupied Paris and a harrowing exploration of murder, betrayal, and evil of staggering proportions.

Boiling with emotion, *Beyond Hope?* is a soul-stirring book that dissects the fears, the failures and the hopes of a cop fighting for survival in urban America.

A hospice doctor shares her own experience with near death and her work with the dying.

A real-life thriller in the vein of *The Devil in the White City*, Kate Winkler Dawson's debut *Death in the Air* is a gripping, historical narrative of a serial killer, an environmental disaster, and an iconic city struggling to regain its footing. London was still recovering from the devastation of World War II when another disaster hit: for five long days in December 1952, a killer smog held the city firmly in its grip and refused to let go. Day became night, mass transit ground to a halt, criminals roamed the streets, and some 12,000 people died from the poisonous air. But in the chaotic aftermath, another killer was stalking the streets, using the fog as a cloak for his crimes. All across London, women were going missing--poor women, forgotten women. Their disappearances caused little alarm, but each of them had one thing in common: they had the misfortune of meeting a quiet, unassuming man, John Reginald Christie, who invited them back to his decrepit Notting Hill flat during that dark winter. They never left. The eventual arrest of the “Beast of Rillington Place” caused a media frenzy: were there more bodies buried in the walls, under the floorboards, in the back garden of this house of horrors? Was it the fog that had caused Christie to suddenly snap? And what role had he played in the notorious double murder that had happened in that same apartment building not three years before--a murder for

which another, possibly innocent, man was sent to the gallows? The Great Smog of 1952 remains the deadliest air pollution disaster in world history, and John Reginald Christie is still one of the most unfathomable serial killers of modern times. Journalist Kate Winkler Dawson braids these strands together into a taut, compulsively readable true crime thriller about a man who changed the fate of the death penalty in the UK, and an environmental catastrophe with implications that still echo today.

At the turn of the twentieth century, many observers considered suicide to be a worldwide social problem that had reached epidemic proportions. In Mexico City, violent deaths in public spaces were commonplace in a city undergoing rapid modernization. Crime rates mounted, corpses piled up in the morgue, and the media reported on sensational cases of murder and suicide. More troublesome still, a compelling death wish appeared to grip women and youth. Drawing on a range of sources from judicial records to the popular press, *Death in the City* investigates the cultural meanings of self-destruction in modern Mexico. The author examines responses to suicide and death and disproves the long-held belief that Mexicans possess a cavalier attitude toward suffering.

NAMED ONE OF THE BEST BOOKS OF THE YEAR BY THE LOS ANGELES TIMES, THE SEATTLE TIMES, AND PUBLISHERS WEEKLY. When a murdered woman is found in the city of Beszel, somewhere at the edge of Europe, it looks to be a routine case for Inspector Tyador Borlú of the Extreme Crime Squad. To investigate, Borlú must travel from the decaying Beszel to its equal, rival, and intimate neighbor, the vibrant city of Ul Qoma. But this is a border crossing like no other, a journey as psychic as it is physical, a seeing of the unseen. With Ul Qoman detective Qussim Dhatt, Borlú is enmeshed in a sordid underworld of nationalists intent on destroying their neighboring city, and unificationists who dream of dissolving the two into one. As the detectives uncover the dead woman's secrets, they begin to suspect a truth that could cost them more than their lives. What stands against them are murderous powers in Beszel and in Ul Qoma: and, most terrifying of all, that which lies between these two cities. BONUS: This edition contains a *The City & The City* discussion guide and excerpts from China Miéville's *Kraken* and *Embassytown*.

Cancer sucks, death sucks even more. But we humans don't have the power to stop either of them from messing with our lives. They enter our lives whenever and wherever they choose to. Cancer is so common that each one of us have known someone who has dealt with the disease; some of us have lost a loved one to cancer. Common does not always mean simple, and it also does not mean we know everything about it. The diagnosis of cancer, regardless of the disease's curability, is almost always nerve-racking, even for healthcare providers like the main character of this book who is a veteran nurse. This book is written in first person; the subject is a middle aged woman who had been separated from her boyfriend some thirty years ago and then after three decades when she searches for an oncologist for treatment of an aggressive cancer that she was recently diagnosed, she finds her ex-boyfriend's name and decides to see him. That brings back the memory of their past together, and she starts going through her old diary she had written some thirty years in the past. Part of the story is set in Nepal (from the diary) and the other part is set in the USA (this takes place after her cancer diagnosis). The main character of the story was born with 'Manglik' cosmic influencer, meaning that the planet Mars "mangal Graha" was in such position in the solar system at the time of her birth that it would have strong negative effect on her husband if she married a man who was non-Manlik (a person born at the time when the planet Mars was not in such position.) What happens next changes the lives of the main characters.
