Explains how food imparts a living wisdom that is separate from the science of nutrient values

- Offers an approach to diet from the perspective of ancient peoples, who understood how the energetic qualities of food affect both physical and spiritual health
- Includes a comprehensive catalog of the energetic properties of myriad foods--from chicken, beef, and potatoes to garlic, avocados, zucchini, and grapefruit

Food is more than simply fuel. It imparts a living wisdom that is beyond the science and mechanics of calories, grams, and nutrient values. Ancient peoples, through their relationships with the plants and animals providing their food, understood that their food conveyed the unique energetic qualities of its source, such as swiftness from wild deer and groundedness from root vegetables. With the rise of agribusiness and industrial food production, people have become disconnected from the sources of their food and are no longer able to register the subtle rhythms, harmony, and energies that food can convey. This separation has thrown the basic human-food relationship out of balance--to the detriment of human consciousness. In *Food Energetics*, Steve Gagné shows how to revitalize our connection to food and remedy our physical and psychic imbalances with the wisdom of food energetics. He provides a comprehensive catalog of foods and their corresponding energetic properties and explains how each food affects us at the deepest spiritual level. By demonstrating how to plan meals that incorporate both dominant and compliant foods, he shows how to provide truly healthy cuisine that nourishes the body and the soul.

The Mobil Travel Guide star ratings are a 45-year-old consumer advocacy concept originally developed following the introduction of the interstate highway system. The goal of the Guide is not to identify and rate every property in the

country, but to recommend only the best in each category, ones that we would send our customers to. We look at the stars from a consumer's point of view, rating lodgings and restaurants across North America from the perspective of the "average traveler." The Guides feature new enhanced descriptions for 2004. Listings include lodgings, restaurants, attractions, and events in established travel destinations, as well as cities and towns on the way to established travel destinations. Our new easy-to-use format makes the Guides even more indispensable to travelers. Each regional guide is organized alphabetically by state, with introductory information about the state followed by city listings in alphabetical order. For each city, the guide lists sites and attractions, lodgings, and then restaurants. One of the features that sets the Mobil Travel Guide apart from its competitors is its proprietary Mobil star rating system. Forty-five plus years of publishing experience and the oldest non-biased rating system in North America make the Mobil Travel Guide series a must-have for travelers wanting up-to-date ratings of hotels and restaurants.
