IMA provides localized services through its offices in Montvale, NJ, USA; Zurich, Switzerland; Dubai, UAE; and Beijing, China. For more information about IMA, please visit [www.imanet.org](http://www.imanet.org).

This book examines the relationship between digital innovations on the one hand, and accounting and management information systems on the other. In particular it addresses topics including cloud computing, data mining, XBRL, and digital platforms. It presents an analysis of how new technologies can reshape accounting and management information systems, enhancing their information potentialities and their ability to support decision-making processes, as well as several studies that reveal how managerial information needs can affect and reshape the adoption of digital technologies. Focusing on the four major aspects data management, information system architecture, external and internal reporting, the book offers a valuable resource for CIOs, CFOs and more generally for business managers, as well as for researchers and scholars. It is mainly based on a selection of the best papers - original double blind reviewed contributions - presented at the 2015 Annual Conference of the Italian Chapter of the Association for Information Systems (AIS).

and Joseph Halper have many years' experience of working in the recreational sector, as educators and practitioners, and the result is a textbook that provides the perfect foundation for any degree-level course in recreation management, as well as being an indispensable reference for all professionals working in recreation service.

In *Compensation and Benefit Design*, Bashker D. Biswas shows exactly how to bring financial rigor to the crucial "people" decisions associated with compensation and benefit program development. This comprehensive book begins by introducing a valuable Human Resource Life Cycle Model for considering compensation and benefit programs. Next, Biswas thoroughly addresses the acquisition component of compensation, as well as issues related to general compensation, equity compensation, and pension accounting. He assesses the full financial impact of executive compensation programs and employee benefit plans, and discusses the unique issues associated with international HR systems and programs. This book contains a full chapter on HR key indicator reporting, and concludes with detailed coverage of trends in human resource accounting, and the deepening linkages between financial and HR planning. Replete with both full and "mini" case examples throughout, the book also contains chapter-ending exercises and problems for use by students in HR and finance programs. HR managers are under intense pressure to become strategic business partners. Many, unfortunately, lack the technical skills in financial analysis to succeed in this role. Now, respected HR management educator Dr. Steven Director addresses this skill gap head-on. Writing from HR's viewpoint, Director covers everything mid-level and senior-level HR professionals need to know to formulate, model, and evaluate their HR initiatives from a financial and business perspective. Drawing on his unsurpassed expertise working with HR executives, he walks through each crucial financial issue associated with strategic talent management, including the quantifiable links between workforces and business value, the cost-benefit analysis of HR and strategic financial initiatives, and specific issues related to total rewards programs. Unlike finance books for non-financial managers, *Financial Analysis for HR Managers* focuses entirely on core HR issues.

Wiley CMAexcel LEARNING SYSTEM EXAM REVIEW 2016 PART 2: Financial Decision Making Covers all 2016 exam changes Includes access to the Online Test Bank, which contains over 1,050 multiple-choice questions Features sample essay questions, knowledge checks, exam tips, and practice questions Multiple-choice question feedback helps CMA candidates focus on areas where they need the most work Helps candidates prepare a solid study plan with exam tips Focuses on important ratios and other analytical tools used to evaluate an organization's financial health Examines key concepts in corporate finance Reviews fundamental information about the decision-making process Feature section examines Financial Statement Analysis, Corporate Finance, Decision Analysis, Risk Management, Investment Decisions, and Professional Ethics Based on the CMA body of knowledge developed by the Institute of Certified Management Accountants (ICMA®), Wiley CMAexcel Learning System Exam Review 2016 features content derived from the exam Learning Outcome Statements (LOS). Passing the CMA exam on your first attempt is possible. We'd like to help.

This book integrates the models employed in the fundamental analysis of a company with the models used by investors in the capital markets to diversify risks and maximize expected returns. The underlying thesis is that the company creates value only if the return on capital invested exceeds the cost of capital, while the objective is to demonstrate how integration of the fields of corporate finance and asset pricing enables comprehensive and accurate company valuation. Companies can thrive only if they are able to create value for shareholders over time. A company's value creation and the correct approach to its measurement require two main skills: first, the ability to analyze and evaluate the company's fundamentals with respect to its business model and its performance over time; and second, knowledge of investors' models with regard to risk diversification and return maximization from which the cost of capital for the firm is derived. Based on this perspective, the

book combines rigorous quantitative analysis with effective use of graphics to aid intuitive understanding.

Covers all 2017 exam changes Text matches Wiley CMAexcel Review Course content structure LOS index in Review Course for easier cross-references to full explanations in text Includes access to the Online Test Bank, which contains 1,000 multiple-choice questions and 5 sample essays Features sample essay questions, knowledge checks, exam tips, and practice questions Multiple-choice question feedback helps CMA candidates focus on areas where they need the most work Helps candidates prepare a solid study plan with exam tips Feature section examines Financial Statement Analysis, Corporate Finance, Decision Analysis, Risk Management, Investment Decisions, and Professional Ethics Based on the CMA body of knowledge developed by the Institute of Certified Management Accountants (ICMA®), Wiley CMAexcel Learning System Exam Review 2017 features content derived from the exam Learning Outcome Statements (LOS).

A new collection of best practices for designing better compensation and benefit programs... 2 authoritative books, now in a convenient e-format, at a great price! 2 authoritative eBooks help you drive more value, efficiency, and competitive advantage from compensation and benefits programs Compensation and benefit programs are the largest expenses in most organizations; in service organizations, they often represent more than 50% of total costs. In this unique 2 eBook package, leading consultant Bashker D. Biswas helps you systematically optimize these programs to maximize value, efficiency, and competitive advantage. In *Employee Benefits Design and Planning*, Biswas brings together all the knowledge you need to make better benefits decisions. He introduces core principles for ensuring proper financing, funding, compliance, and recordkeeping; accurate actuarial calculations; and effective employee communication. Building on these principles, he guides you through benefits ranging from healthcare and disability insurance to retirement and cafeteria plans. You'll find up-to-date discussions of complex challenges, such as the Affordable Care Act and global benefits planning. Throughout, he offers essential insights for managing rising costs and risks, while ensuring that benefits programs improve productivity, reflect best practices, and align with your organization's strategy and goals. Next, in *Compensation and Benefit Design*, Biswas helps HR professionals bring true financial and accounting discipline to compensation and benefit design, tightly align talent management to strategy, and quantify program performance in the language of finance. Biswas thoroughly explains best-fit practices for superior program design, demystifies relevant financial and accounting concepts, and illuminates key connections between HR program development and GAAP/IFRS accounting requirements. His far-reaching coverage ranges from integrating compensation and benefits into Balanced Scorecards to managing expatriate compensation. Biswas reveals the true financial implications of every element of modern compensation and benefit programs, from base salaries to stock incentives, sales compensation to healthcare cost containment. Perhaps most important, he helps you systematically measure the value of your investments -- so you can both prove and improve your performance. Simply put, this collection brings together unparalleled tools for optimizing compensation and benefits programs -- whether you're in HR, finance, line-of-business management, or corporate management. From Dr. Bashker D. Biswas, world-renowned expert in employee compensation and benefits program design

?This book contains a collection of research papers on accounting information systems including their strategic role in decision processes, within and between companies. An accounting system is a complex system composed of a mix of strictly interrelated elements such as data, information, human resources, IT tool, accounting models and procedures. Accounting information systems are often considered the instrument by default for accounting automation. This book aims to sketch a clear picture of the current state of AIS research, including design, acceptance and reliance, value-added decision making, interorganizational links, and process improvements. The contributions in this volume emphasize that AIS has grown into a powerful strategic tool. The book provides evidence for this observation by examining a wide

range of current issues ranging from theory development in AIS to practical applications of accounting information systems. In particular it focuses on themes of growing interest in the realm of XBRL and Financial Reporting, Management Information Systems, IT/IS Audit and IT/IS Compliance. The book will be of interest to financial and managerial accountants and IT/IS practitioners, including information systems managers and consultants.

In *Compensation and Benefit Design*, Bashker D. Biswas shows exactly how to bring financial rigor to the crucial "people" decisions associated with compensation and benefit program development. This comprehensive book begins by introducing a valuable Human Resource Life Cycle Model for considering compensation and benefit programs. Next, Biswas thoroughly addresses the acquisition component of compensation, as well as issues related to general compensation, equity compensation, and pension accounting. He assesses the full financial impact of executive compensation programs and employee benefit plans, and discusses the unique issues associated with international HR systems and programs. This book contains a full chapter on HR key indicator reporting, and concludes with detailed coverage of trends in human resource accounting, and the deepening linkages between financial and HR planning. Replete with both full and "mini" case examples throughout, the book also contains chapter-ending exercises and problems for use by students in HR and finance programs. ¿ More than ever before, HR practitioners must empirically demonstrate a clear link between their practices and firm performance.

In *Investing in People*, Wayne F. Cascio and John W. Boudreau show exactly how to choose, implement, and use metrics to improve decision-making, optimize organizational effectiveness, and maximize the value of HR investments. They provide powerful techniques for looking inside the HR "black box," implementing human capital metrics that track the effectiveness of talent policies and practices, demonstrating the logical connections to financial and line-of-business, and using HR metrics to drive more effective decision-making. Using their powerful "LAMP" methodology (Logic, Analytics, Measures, and Process), the authors demonstrate how to measure and analyze the value of every area of HR that impacts strategic value.

Advances in technology have resulted in new and advanced methods to support decision-making. For example, artificial intelligence has enabled people to make better decisions through the use of Intelligent Decision Support Systems (DSS). Emerging research in DSS demonstrates that decision makers can operate in a more timely manner using real-time data, more accurately due to data mining and 'big data' methods, more strategically by considering a greater number of factors, more precisely and inclusively due to the availability of social networking data, and with a wider media reach with video and audio technology. This book presents the proceedings of the IFIP TC8/Working Group 8.3 conference held at the Université Pierre et Marie Curie in Paris, France, in June 2014. Throughout its history the conference has aimed to present the latest innovations and achievements in Decision Support Systems. This year the conference looks to the next generation with the theme of new technologies to enable DSS2.0. The topics covered include theoretical, empirical and design science research; case-based approaches in decision support systems; decision models in the real-world; healthcare information technology; decision making theory; knowledge management; knowledge and resource discovery; business intelligence; group decision support systems; collaborative decision making; analytics and 'big data'; rich language for decision support; multimedia tools for DSS; Web 2.0 systems in decision support; context-based technologies for decision making; intelligent systems and technologies in decision support; organizational decision support; research methods in DSS 2.0; mobile DSS; competing on analytics; and social media analytics. The book will be of interest to all those who develop or use Decision Support Systems. The variety of methods and applications illustrated by this international group of carefully reviewed papers should provide ideas and directions for future researchers and practitioners alike.

Understanding cost behavior is a fundamental element of cost accounting and the management of a firm. Deviating from the traditional assumption of symmetric cost behavior, numerous recent research studies show that costs are sticky, that is, they decrease less when sales fall than they increase when sales rise. Daniel Baumgarten comprehensively analyzes the cost stickiness phenomenon by discussing its development and all relevant findings presented in the research literature. Furthermore, he provides several suggestions for future research and discusses important implications of cost stickiness for fundamental analysis and analysts' forecasts by means of two comprehensive empirical analyses.

This revised edition of *ADVANCED MANAGEMENT ACCOUNTING* provides a comprehensive and updated coverage of important topics, current trends, latest ideas and researches in management accounting. Expanding on its theoretical base, the book provides practical exposition to help students strengthen conceptual understanding and develop problem-solving skills to succeed in the classroom and beyond. Pedagogically enriched with new features and an impressive layout, this new edition is an essential text for students of M.Com, MBA, CA, ICWA, CS, CFA and other professional courses

The present economic and social environment has given rise to new situations within which companies must operate. As a first example, the globalization of the economy and the need for performance has led companies to outsource and then to operate inside networks of enterprises such as supply chains or virtual enterprises. A second instance is related to environmental issues. The statement about the impact of industrial activities on the environment has led companies to revise processes, to save energy, to optimize transportation.... A last example relates to knowledge. Knowledge is considered today to be one of the main assets of a company. How to capitalize, to manage, to reuse it for the benefit of the company is an important current issue. The three examples above have no direct links. However, each of them constitutes a challenge that companies have to face today. This book brings together the opinions of several leading researchers from all around the world. Together they try to develop new approaches and find answers to those challenges. Through the individual chapters of this book, the authors present their understanding of the different challenges, the concepts on which they are working, the approaches they are developing and the tools they propose. The book is composed of six parts; each one focuses on a specific theme and is subdivided into subtopics.

This book explains the vocabulary of cost-volume-profit (breakeven) analysis (CVP), explores the breadth of applications of CVP, and illustrates the use of CVP concepts in a broad range of management and marketing scenarios. The book examines the proper identification of a 'unit', the various formulations of breakeven, profit planning using the breakeven formulas, and the application of CVP in sensitivity analysis. Each chapter will offer several important ingredients for a practical 'how to' approach: the type of data needed, the formula, how to calculate and interpret the math, a specific example followed by a brief review of the assumptions and limitations of that method.

benefit programs... fully addresses issues related to acquisition, general compensation, equity compensation, and pension accounting... assesses the full financial impact of executive compensation and employee benefit programs... and discusses the unique issues associated with international HR programs. Finally, in People Analytics, Ben Waber helps you discover powerful hidden social "levers" and networks within your company, and tweak them to dramatically improve business performance and employee fulfillment. Drawing on his cutting-edge work at MIT and Harvard, Waber shows how sensors and analytics can give you an unprecedented understanding of how your people work and collaborate, and actionable insights for building a more effective, productive, and positive organization. Whatever your HR role, these 6 eBooks will help you apply today's most advanced innovations and best practices to optimize workplace performance -- and drive unprecedented business value. From world-renowned human resources experts Alison Davis, Jane Shannon, Wayne Cascio, John W. Boudreau, Steven Director, James C. Sesil, Bashker D. Biswas, and Ben Waber .

This book provides process costing; activity-based costing; cost-volume-profit; inventory; balanced scorecard; overhead application and analysis; budgeting; financial statement analysis; decentralization and segment reporting.

This book presents a variety of discussions from different countries about regulations and applications of ethics in business practice. It demonstrates how Ethics, both in the world of business and in academic life, is consistently a central and unavoidable issue that institutions must devise new regulations on a regular basis to address. Given that applying such regulations becomes complicated in a global business landscape and that International companies have lost large amounts of revenues due to fraudulent activities, the book provides insights for professionals in business world to teach, learn, apply, measure and report on companies' daily business. Business and Professional Ethics: Theories, Standards, and Analysis is essential reading for researchers and students in business schools around the world.

Serving as a general, nontechnical resource for students and academics, these volumes provide an understanding of the development of business as practiced around the world.
