Mobile platform development has lately become a technological war zone with extremely dynamic and fluid movement, especially in the smart phone and tablet market space. This Synthesis lecture is a guide to the latest developments of the key mobile platforms that are shaping the mobile platform industry. The book covers the three currently dominant native platforms -- iOS, Android and Windows Phone -- along with the device-agnostic HTML5 mobile web platform. The lecture also covers location-based services (LBS) which can be considered as a platform in its own right. The lecture utilizes a sample application (TwitterSearch) that the authors show programmed on each of the platforms. Audiences who may benefit from this lecture include: (1) undergraduate and graduate students taking mobile computing classes or self-learning the mobile platform programmability road map; (2) academic and industrial researchers working on mobile computing R&D projects; (3) mobile app developers for a specific platform who may be curious about other platforms; (4) system integrator consultants and firms concerned with mobilizing businesses and enterprise apps; and (5) industries including health care, logistics, mobile workforce management, mobile commerce and payment systems and mobile search and advertisement. Table of Contents: From the Newton to the iPhone / iOS / Android / Windows Phone / Mobile Web / Platform-in-Platform: Location-Based Services (LBS) / The Future of Mobile Platforms / TwitterSearch Sample Application

Probable Questions divided into 8 sections as asked in the final exam. • Includes MCQs on Latest Policies, Schemes, Bills, Act, Agreements, Meets etc. • Questions designed on exact difficulty level of IAS Prelim Exam. • All the questions are fully solved with detailed explanations. • The Unit 2 provides Quick Revision Mind Maps to provide useful inputs for the Prelim Exam. • The Unit 3 provides Includes Errorless Solutions to revisions 5 Year IAS Prelim Questions. • The Book is the most authentic source of newly created MCQs available for IAS Prelim Exam

This book presents the techniques and tools to design for mobile devices. It is not easy to understand how the mobile market looks and works in general. There are many questions: How to pick the right mobile strategy and select the right approach for a website? What design patterns and what UX techniques can assist in designing quicker and better for mobile devices? What design patterns help when building responsive websites and to optimize the performance for mobile? How should the design process be different from traditional design workflow? This book attempts to answer these questions with the valuable insights of mobile design experts. --

This 2-volume set constitutes the thoroughly refereed post-conference proceedings of the 10th International Conference on Security and Privacy in Communication Networks, SecureComm 2014, held in Beijing, China, in September 2014. The 27 regular and 17 short papers presented were carefully reviewed. It also presents 22 papers accepted for four workshops (ATCS, SSS, SLSS, DAPRO) in conjunction with the conference, 6 doctoral symposium papers and 8 poster papers. The papers are grouped in the following topics: security and privacy in wired, wireless, mobile, hybrid, sensor, ad hoc networks; network intrusion detection

and prevention, firewalls, packet filters; malware, and distributed denial of service; communication privacy and anonymity; network and internet forensics techniques; public key infrastructures, key management, credential management; secure routing, naming/addressing, network management; security and privacy in pervasive and ubiquitous computing; security & privacy for emerging technologies: VoIP, peer-to-peer and overlay network systems; security & isolation in data center networks; security & isolation in software defined networking.

covering important aspects of the network ecosystem such as routing, DNS, privacy, security, and performance. They are organized in the following topical sections: mobile networks; measurement at Internet scale; measurement at other scales; domain names; failures; security and privacy; and Web.

This two-volume book focuses on both theory and applications in the broad areas of communication technology, computer science and information security. It brings together contributions from scientists, professors, scholars and students, and presents essential information on computing, networking, and informatics. It also discusses the practical challenges encountered and the solutions used to overcome them, the goal being to promote the “translation” of basic research into applied research, and of applied research into practice. The works presented here will also demonstrate the importance of basic scientific research in a range of fields.

E-commerce is growing at an exponential rate in India. Despite this, it is still at an evolving stage as economic and regulatory frameworks pertaining to various segments of e-commerce are being put into place by the government. This book presents a comprehensive analysis of the economic and regulatory aspects of

the e-commerce sector by assessing the trends and characteristics, and addressing the issues and challenges associated with it. It dwells into key issues including FDI regulations, taxation, valuation of e-commerce companies, market structure, competition, payment mechanism, blockchain and cryptocurrencies, and logistics. The issues and challenges addressed in this book frequently appear as discussion points in policy debates, research forums and popular media. However, information on these is scant and often scattered. This book bridges gaps in the available literature on e-commerce

The National Eligibility Test (NET), also known as UGC NET or NTA-UGC-NET, is the test for determining the eligibility for the post of Assistant Professor and/or Junior Research Fellowship (JRF) award in Indian universities and colleges. UGC NET is considered as one of the toughest exams in India, with success ratio of merely 6%. Previously, the passing ratio was around 3% - 4%. Assistant Professors in private colleges may or may not be NET qualified but NET qualification is mandatory for universities & government colleges.

China's information war against the United States is clever technically, broadly applied and successful. The intelligence community in the U.S. has publicly stated this is a kind of war we do not know how to fight—yet it is the U.S. military that developed and expanded the doctrine of information war. In fact, the U.S.

military is at a disadvantage because it is part of a democratic, decentralized system of government that separates the state from commercial business. China's political systems are more easily adapted to this form of warfare, as their recent land seizures in the South China Sea demonstrate. We call this annexation, when it is a new form of conquest.

The market for mobile apps continues to evolve at a breakneck pace, as tablets join the parade of smartphones and feature phones. If you're an experienced web developer, this second edition of this popular book shows you how to build HTML5 and CSS3-based apps that access geolocation, accelerometer, multi touch screens and other features in these mobile devices. You'll learn how to build a standard app core that you can extend to work with specific devices. You'll also discover how to deal with platform variations, browsers, native web platforms, HTML5 compatibility, design patterns for mobile development, and other issues. Learn how to use your existing web skills to move into mobile development Discover the particulars and pitfalls of building mobile apps with HTML5, CSS, and other standard web tools Create effective user interfaces in the mobile environment for touch and non-touch devices Understand variations among iOS, Android, Windows Phone, BlackBerry, and other mobile platforms Bypass the browser to create full screen and native web apps, e-books and

La rivoluzione digitale è ormai un processo irreversibile, professionisti e cittadini operano quotidianamente integrati in ambienti digitali, per attività giuridiche, economiche e sociali. Dunque ormai, non si può prescindere dal possedere conoscenze informatiche. Il volume si prefigge di coadiuvare, in una visione lineare e fruibile a tutti, lo sviluppo di approfondimenti sulle tecnologie dell'informazione e della comunicazione digitale con una progressione verso l'analisi degli aspetti tecnici dell'informatica forense. L'individuazione e la gestione della prova informatica, le differenti tipologie di cybercrime e computer crime, il deep e dark web, la social network analysis così come le criptovalute e gli strumenti di investigazione di live forensics, post mortem forensics e mobile forensics, sono solo alcuni dei temi trattati dagli autori.

What's the best way to develop for a Web gone wild? That's easy. Simply scrap the rules you've relied on all these years and embrace uncertainty as a core tenet of design. In this practical book, veteran developer Rob Larsen outlines the principles out what he calls The Uncertain Web, and shows you techniques necessary to successfully make the transition. By combining web standards, progressive enhancement, an iterative approach to design and development, and

world. In 2014, India was the third-largest online market with more than 198 million internet users, ranked only behind China and the United States and declaring itself as a market not to be ignored on the global stage. Furthermore, men dominated internet usage with 61 percent, while only 39 percent of women used it. The average daily online usage in India amounted 5.1 hours. There are 345 million users in India, counted in January 2016. With the growing needs of humans, it has become a challenge for women to fulfill all their responsibilities and to perform all their roles at the same time. Therefore, their dependency on family members, helpers/maids, friends, neighbors, and the media has increased. Media here includes print (i.e. newspaper, magazine, tabloids), electronic (i.e. television, radio), and new media (i.e. internet and mobile technology). This study evaluates how the internet can help working women to perform their household responsibilities.

This book constitutes the thoroughly refereed post-conference proceedings of the 19th International Conference on Information Security Applications, WISA 2018, held on Jeju Island, Korea, in August 2018. The 11 revised full papers and 11 short papers presented in this volume were carefully reviewed and selected from 44 submissions.

#The primary focus of WISA 2018 was on systems and network security including all other technical and practical aspects of security applications and also on the embedded, unmanned or autonomous systems and cyber physical systems in general.
