The wars in Afghanistan and Iraq have focused new attention on a perennial problem: how to end wars well. What ethical considerations should guide war's settlement and its aftermath? In cases of protracted conflicts, recurring war, failed or failing states, or genocide and war crimes, is there a framework for establishing an enduring peace that is pragmatic and moral? Ethics Beyond War's End provides answers to these questions from the just war tradition. Just war thinking engages the difficult decisions of going to war and how war is fought. But from this point forward just war theory must also take into account what happens after war ends, and the critical issues that follow: establishing an enduring order, employing political forms of justice, and cultivating collective forms of conciliation. Top thinkers in the field—including Michael Walzer, Jean Bethke Elshtain, James Turner Johnson, and Brian Orend—offer powerful contributions to our understanding of the vital issues associated with late- and post conflict in tough, real-world scenarios that range from the US Civil War to contemporary quagmires in Afghanistan, the Middle East, and the Congo.

"This is the story of Israel ... present day Israel. It is also the story of how one little green fallen high being called Mundis Veridis was sent back in time by Satan to get the names and the numbers of those demons who with such "lack of insight" slowed to nation of Israel to be reborn."

More and more people are waking up spiritually. And for most of them, the question becomes: Now what? "Information about life after awakening is usually not made public," explains Adyashanti. "It's most often shared only between teachers and their students." The End of Your World is his response to a growing need for direction on the spiritual path. Consider this Adyashanti's personal welcome to "a new world, a state of oneness." Adyashanti begins by describing the "I got it/I lost it" phenomenon that perplexes so many of his students—the fluctuation between what he calls "nonabiding" awakening, and the ultimate state of "abiding" enlightenment. With straight talk and penetrating insight, Adyashanti then points out the pitfalls and cul-de-sacs that "un-enlighten" us along the journey, including the trap of meaninglessness, how the ego can "co-opt" realization for its own purposes, the illusion of superiority that may accompany intense spiritual breakthroughs, and the danger of becoming "drunk on emptiness." "Full awakening comes when you sincerely look at yourself, deeper than you've imagined, and question everything," teaches Adyashanti. The End of Your World is your invitation to join Adyashanti for an honest investigation of what you really are—and how to live once you discover it.

Bible prophecy expert Ron Rhodes offers an easy-to-understand yet detailed chronology and explanation of end-times events. The chapters are arranged around the major end-times themes: the rapture, the tribulation, the millennial kingdom, and the eternal state. Each chapter begins with a list of the specific events it covers, making this an extremely user-friendly chronological guide to end-times biblical prophecy. Rhodes allows for various interpretations among Christians. Yet the sequence he describes is faithful to the biblical text, based on a literal approach to prophecy, and held by many Bible scholars. As readers discover that they really can understand Bible prophecy, they will come to love and trust the Scriptures like never before.

What do the humanities have to offer in the twenty-first century? Are there compelling reasons to go on teaching the literate arts when the schools themselves have become battlefields? Does it make sense to go on writing when the world itself is overrun with books that no one reads? In these simultaneously personal and erudite reflections on the future of higher education, Richard E. Miller moves from the headlines to the classroom, focusing in on how teachers and students alike confront the existential challenge of making life meaningful. In meditating on the violent events that now dominate our daily lives—school shootings, suicide bombings, terrorist attacks, contemporary warfare—Miller prompts a reconsideration of the role that institutions of higher education play in shaping our daily experiences, and asks us to reimagine the humanities as centrally important to

From Connecticut, where Wilford Woodruff was born in 1807, to San Francisco, where he was befriended by the cosmopolitan Bohemian Club before dying in 1898, Woodruff's life was unpredictable. The same man who consulted scientific texts for the cultivation of fruit trees for his personal garden was equally known for his apocalyptic vision on a Navajo mesa in Arizona in 1880. The man who balanced his ledger with penny-accuracy modeled buckskin temple robes to friends on his birthday and accepted from Brigham Young, as a birthday gift, one of Young's daughters as a wife. Woodruff became president of the Mormon church while hiding from federal marshals. Convinced that non-Mormons, or "gentiles," would be smitten by the calamities promised in the Bible, he bided his time in exile until Mormonism prevailed. However, as the Parousia was delayed, he eventually decided to compromise with the United States. To complement the exhaustive ten-volume Wilford Woodruff diary series and index published by Signature Books as a limited edition, Susan Staker has condensed the highlights of Woodruff's revealing personal narrative into one readable volume, along with prefatory information, annotation, and appendices.

"The universe is not a world of separate things and events but is a cosmos that is connected, coherent, and bears a profound resemblance to the visions held in the earliest spiritual traditions in which the physical world and spiritual experience were both aspects of the samereality and man and the universe were one. The findings that justify this new vision of the underlying logic of the universe come from almost all of the empirical sciences: physics, cosmology, the life sciences, and consciousness research. They explain how interactions lead to interconnections that produce instantaneous and multifaceted coherence—what happens to one part also happens to the other parts, and hence to the system as a whole. The sense of sacred oneness experienced by our ancestors that was displaced by the unyielding material presumptions of modern science can be restored, and humanity can once again feel at home in the universe".

This book examines the frequently expressed assertion by political commentators and historians that the UK is currently experiencing 'the end of a political era'. It does this by analysing the seismic shifts in the way politics have been conducted in recent years, principally since the EU Referendum in 2016. It also considers these developments in the light of the relative political stability which lasted from the end of the Second World War, and it compares this with another discrete 'political era', spanning from 1832 to the 1906 election. Comparisons between the two periods make a compelling case for contemporary claims and also provide a broad definition of what constitutes a political era. The book will be of importance to historians and students of history, but in its broader treatment of such current issues as democracy, voter motivation, electoral systems, globalisation, national and local identities, and migration, it will also appeal to the politically-minded general reader.

This book gives a compelling analysis and explanation of shifts in China's non-intervention policy in Africa. Systematically connecting the neoclassical realist theoretical logic with an empirical analysis of China's intervention in African civil wars, the volume highlights a methodical interlink between theoretical and empirical analysis that takes into consideration the changing status of rising powers in the global system and its effect on their intervention behaviour. Based on field research and expert interviews, it provides a rigorous analysis of China's emergent intervention behaviour in some key African conflicts in Libya, South Sudan and Mali and broadens the study of external interventions in civil wars to include the intervention behaviour of non-Western rising powers.
